Energy Saving

was born as a company Engineering and Consulting by some professionals and historic partnership between companies with strong technical skills, specialized in **Renewable Energy** in **Project Finance** and **Energy Consulting**. We operate in the field of air conditioning and the **Energy Saving** buildings, both public and private, with particular attention to the supply and installation of equipment for the production of energy **Photovoltaic**, **Wind** and **Biomass**.

Our consulting services, in Italy and all over the world, are geared to technological innovation & Meeting Sports, the responsible use of energy, global sustainability, the design of more efficient energy systems and the use of renewable energy sources, as well as the mobility of sport and energy

Our company offers consulting services, engineering, supply and installation of integrated technological systems that use renewable energy, together with all the components related to equipment connected to these systems, in partnership with some reality in the world of cooperatives. Qualified through a catalog of products, and on the basis of agreements with Italian and foreign multinational companies, we are able to meet the demands and needs of the most diverse, as we strongly believe in the excellence of a service evolved in the post sale.
